Projects

Medicare- Doctor Appointment Booking Website(MERN Stack)

March 2025-April 2025

- Engineered a role-based authentication system for doctors/patients using JWT.
- Built dynamic doctor profile dashboards and integrated Cloudinary for photo uploads.
- Added intuitive appointment booking features with real-time feedback (toast notifications).

CampusMart- AI Bazaar (MERN Stack)

August 2024-April 2025

- Built a secure platform for hostellers to buy/sell/bid second-hand goods using React, Node, and MongoDB.
- Integrated AI for image-based product classification, improving listing accuracy.
- Enabled JWT-based authentication for verified access
- Designed dynamic bidding UI and product filtering features.

Uber Clone (MERN Stack)

Jan 2025-March 2025

- Deployed a full-stack ride-hailing application with React, Node.js, Express, and MongoDB, integrating Socket.io for real-time ride status updates.
- Implemented Google Maps API for location search, live tracking, and fare estimation.
- Built a dynamic user authentication system and real-time driver matching using WebSockets.
- Designed a responsive UI with GSAP animations and optimized API calls for better performance.

Club Management System

Jan 2024-May 2024

- Enhanced a portal for students to register and stay updated on campus events.
- Streamlined event access for over 200+ participants using HTML, CSS and MySQL.
- Initiated an automated alert feature for upcoming events, resulting in increased user interaction with the portal by sending out 120 notifications monthly to keep students informed about activities.

Leadership and Contributions

- Content Team lead at iOS Club and Fusion Club. Authored engaging emails, technical guides, and scripts to support event activities and enhance attendee experience.
- Contributed to organizing creative and cultural events, such as dance shows and talent exhibitions.

ADDITIONAL

Technical Skills: DSA in Java, SQL; Proficient in MATLAB, Python, C++, HTML, CSS, JS, MySQL, MERN, Docker, Figma

Coding: Solved 500+ questions with the total rank of 1.4 lakh overall on the LeetCode platform.

Languages: Fluent in Hindi, English; Basic French.

Certifications & Training: The Fundamentals of Digital Marketing [Google Digital Garage], Cloud Computing by NPTEL, Machine Learning A-Z (Udemy), Blockchain Developer(IBM), Devops(IBM), Marketing Analytics(NPTEL)
