Projects

Medicare- Doctor Appointment Booking Website(MERN Stack)

March 2025-April 2025

- Engineered a role-based authentication system for doctors/patients using JWT.
- Built dynamic doctor profile dashboards and integrated Cloudinary for photo uploads.
- Added intuitive appointment booking features with real-time feedback (toast notifications).

CampusMart- AI Bazaar (MERN Stack)

August 2024-April 2025

- Built a secure platform for hostellers to buy/sell/bid second-hand goods using React, Node, and MongoDB.
- Integrated AI for image-based product classification, improving listing accuracy.
- Enabled JWT-based authentication for verified access
- Designed dynamic bidding UI and product filtering features.

Uber Clone (MERN Stack)

Jan 2025-March 2025

- Deployed a full-stack ride-hailing application with React, Node.js, Express, and MongoDB, integrating Socket.io for real-time ride status updates.
- Implemented Google Maps API for location search, live tracking, and fare estimation.
- Built a dynamic user authentication system and real-time driver matching using WebSockets.
- Designed a responsive UI with GSAP animations and optimized API calls for better performance.

Club Management System

Jan 2024-May 2024

- Enhanced a portal for students to register and stay updated on campus events.
- Streamlined event access for over 200+ participants using HTML,CSS and MySQL.
- Initiated an automated alert feature for upcoming events, resulting in increased user interaction with the portal by sending out 120 notifications monthly to keep students informed about activities.

Experience

- Technovate (IIT Indore)- Developed an agentic AI driven platform for inventory system promising sustainability and solutions based on demands. It also displays a dashboard to successfully gain inferences and insights with minimal efforts.
- Arthneeti (IIM Nagpur)- Case based competition where a system was streamlined to enhance green bonds to efficiently launch Electric Vehicle access.

Leadership and Contributions

- Content Team lead at iOS Club and Fusion Club. Authored engaging emails, technical guides, and scripts to support event activities and enhance attendee experience.
- Contributed to organizing creative and cultural events, such as dance shows and talent exhibitions.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, C++, JavaScript, SQL, MATLAB, HTML,CSS
- Frameworks and Technologies:** MERN Stack (MongoDB, Express.js, React, Node.js), MySQL, JWT Authentication, Google Maps API, WebSockets
- Developer Tools:** Docker, Figma, Git/GitHub, Cloudinary, Socket.io, GSAP

EXTRACURRICULARS

- Languages:** English, Hindi, Basic French
- Soft skills:** Communication, Teamwork, Problem-solving, Leadership, Adaptability
- Certifications:** Cloud Computing [NPTEL], Machine Learning A-Z [Udemy], Blockchain Developer[IBM], DevOps[IBM], Marketing Analytics[NPTEL]
